

AMIR AIJAZ

AI Engineer

Karachi, Pakistan | +92 323 3232974 | amirejaz790@gmail.com
amiraijaz.com | github.com/amiraijaz | linkedin.com/in/amiraijaz

SUMMARY

AI engineer who takes systems from notebook to production and keeps them there. Two years shipping LLM applications, RAG pipelines, voice agents and computer vision for companies in Norway, the US and Canada, with a bias for the parts that decide whether AI survives contact with real users: cost per request, latency, tenant isolation and test coverage. Co-founder of Codexyo, where I lead engineering; author of aigovkit, a PyPI SDK for LLM governance and observability, and governance-bench-v1, a public benchmark on Hugging Face. BS Computer Science, University of Karachi.

EXPERIENCE

Co-founder & AI Engineer | Codexyo

Jun 2026 to Present

AI engineering studio, remote. Lead engineering and delivery.

- Design and ship production AI systems for small and mid-sized businesses: legal-operations automation with human-gated document generation, voice agents for lead qualification, project-management platforms, inventory and forecasting tools, and quantitative analysis systems.
- Own architecture, cost budgets, test discipline and production launches; multi-tenant FastAPI and PostgreSQL backends, Next.js frontends, Claude and OpenAI APIs, Vapi, n8n, AWS.

Fractional CTO (part-time, contract) | HAYA Trading Inc.

Jul 2026 to Present

Canadian retail company launching HAYA Legacy (hayalegacy.com), a Canada-wide e-commerce brand. Remote.

- Own the digital business end to end: Shopify build and integrations, growth and marketing automation, analytics, and AI-assisted merchandising and customer-support tooling.

AI Engineer | Viral Tech, Norway

Aug 2025 to Jun 2026

Full-time, remote.

- Built a production multi-tenant agentic commerce chatbot engine with Postgres row-level-security isolation, a WooCommerce adapter, a PII firewall and an owner dashboard, validated on a live 300+ product store.
- Added semantic retrieval (BGE-M3 embeddings on GPU) and a cost-optimized LLM routing layer; benchmarked emerging LLMs on capability, latency and cost.
- Built Knowlyst, a RAG system over web and video links, and n8n automation workflows.

AI Engineer | TechThrone Innovations, Karachi

May 2025 to Jul 2025

- Built a self-hosted local LLM assistant for content and social media management; shipped text-to-image tools, HR screening automation and lead-generation agents; analyzed geospatial and business data for enterprise clients (CBL, EBM).

Junior AI Engineer | CodeNexo, Karachi

Jan 2025 to Apr 2025

- Built AI newsletter and blog generation tools with the Claude API, Flask and the YouTube Data API; automated workflows via Asana; deployed applications on AWS.

Computer Vision Intern | The Disrupt Labs, Karachi

Jun 2024 to Oct 2024

- Developed Python tooling to measure 2D object distances in warehouses and applied open-source depth-estimation models to real-time CCTV feeds.

AI Research Intern | Smart City Lab, NCAI, NED University

Dec 2023 to May 2024

- Built an Arabic-language voice assistant for Sahl AI (dataset preparation, fine-tuning, integration); benchmarked Wav2Vec against Google Speech for Urdu speech-to-text; prepared annotated datasets for ADAS projects.

EDUCATION

BS Computer Science | University of Karachi

Jan 2021 to Dec 2024

Medium of instruction: English. Degree and transcript attested by HEC.

- Final year project: SignVision, a real-time Urdu sign-language recognition system (MediaPipe Holistic keypoints, CNN-LSTM).
- Coursework: Artificial Intelligence, Natural Language Processing, Data Warehousing and Data Mining, Statistics and Data Analysis, Data Structures.

OPEN SOURCE AND PUBLICATIONS

- **aigovkit**: Python SDK for AI governance and LLM observability. PyPI, v0.2.0, 2026.
- **governance-bench-v1**: 200-case benchmark dataset for AI governance scanners. Hugging Face (Vigil-ai), CC-BY-4.0, 2026.
- **Vigil**: open-source AI governance dashboard with model registry, audit logging, PII and toxicity detection and NIST AI RMF reports (FastAPI, React, PostgreSQL, Redis, Docker).

SELECTED PROJECTS

- **Legal Operations Platform (Codexyo, production)**. Autonomous court-filing intake for a US litigation firm: IMAP ingestion of court alerts, LLM classification of case type with flag-for-review, defendant address resolution from state open-data registries, multi-defendant handling, two-pass render verification, and human-gated letter generation with auto-release behind six safety gates and an append-only ledger. Federal docket enumeration via the CourtListener API and a shadow-mode RECAP acquisition rung. Marketing ROI dashboard joining CRM funnel data with Meta ad spend. About 575 hermetic tests; letters mailed in production. *Python, FastAPI, Claude API, Next.js, Railway, Vercel*.
- **AI Voice Lead-Generation Platform (production)**. Multi-tenant outbound and inbound voice agent for phone qualification and warm transfer: concurrency-safe campaign dispatcher, voicemail and call-screening handling, TCPA controls, per-tenant isolation; engineered for high call volume at about USD 0.12 per call-minute. 586 hermetic tests with fully faked telephony. *Vapi, Deepgram, Cartesia, FastAPI, Celery, Redis, PostgreSQL, Next.js*.
- **Multi-tenant Agentic Commerce Engine (Viral Tech)**. Engine-plus-cartridge chatbot platform for e-commerce stores with PostgreSQL row-level-security tenant isolation, WooCommerce adapter, PII firewall and GDPR retention rules, self-hosted BGE-M3 semantic retrieval, cost-optimized LLM routing and confirm-gated payment-link handoff; 214 tests, validated on a live 300+ product store. *FastAPI, PostgreSQL, Qdrant, Redis, Claude and OpenAI APIs*.
- **Construction Project-Management OS (Codexyo)**. Proprietary platform for a US custom home builder: project hub, AI communication centre, meeting intelligence, budget vs actual, selections, schedule, trade-partner management, client portal and automated weekly updates. *Next.js, FastAPI, Supabase, Claude API*.
- **AI Restaurant Inventory System (Codexyo)**. Inventory and purchasing platform with purchase-order recommendations, supplier email automation, FIFO stock tracking and a mobile-responsive UI, deployed for a hospitality client. *FastAPI, React, Supabase, Render*.
- **Quant Strategy Validation Engine**. Offline backtesting harness over about nine years of BTC, ETH and SOL data with strict no-look-ahead enforcement, realistic fee and slippage modelling and out-of-sample validation; falsified several directional strategies and produced a funding-rate carry recommendation with a client-facing report. 43 hermetic tests. *Python, Pandas, NumPy*.
- **Legal Mind AI (live) and Knowlyst**. Legal Mind AI: RAG assistant answering natural-language questions over large legal PDFs with cited sources, with Gemini, OpenAI and Ollama backends. Knowlyst: RAG system that ingests web and video links and answers questions over the stored content. *LangChain, ChromaDB, FastAPI*.
- **Computer Vision**. UK License Plate Detection and Recognition (YOLOv8, OCR); Real-time Face Recognition Attendance System with Firebase; Visual Question Answering system combining vision and NLP models. Code on GitHub. *PyTorch, YOLOv8, OpenCV, Firebase*.

TECHNICAL SKILLS

LLMs and agents: LangChain, LangGraph, RAG, CrewAI, MCP, Vapi, ElevenLabs, Qdrant, Pinecone, ChromaDB, OpenAI, Anthropic and Gemini APIs, prompt engineering, LLM evaluation and cost optimization

Machine learning and NLP: PyTorch, TensorFlow, Hugging Face, transformers, sentence-transformers, scikit-learn, spaCy

Computer vision: YOLOv8, OpenCV, MediaPipe, image segmentation, OCR

Backend, web and cloud: Python, FastAPI, Flask, Celery, React, Next.js, PostgreSQL, Redis, Supabase, Docker, AWS, Railway, Vercel, n8n, Pytest, CI/CD

CERTIFICATIONS AND LANGUAGES

- Artificial Intelligence on Microsoft Azure (Microsoft, Coursera); Python for Data Science, AI and Development (IBM, Coursera); Introduction to AI with Python (NCIA and CERD Academy, NED University).
- English: IELTS Academic 6.5 overall, CEFR B2 (Sep 2025). Urdu: native. Punjabi: conversational.
